FullStack MEAN Stack Developer

Lamplight Analytics (Hong Kong)

Jul 2015 - Feb 2016

Technologies used:

- NodeJs, AngularJS, Underscore, Express, MongoDB, CouchDb, Rest-API, Google Apis, D3, Jekyll, Static Websites, Custom Made CMS Admin System, Ruby(part of Jekyll), Jekyll plugins, Angular Directives, Balsamiq, After Effects, Adobe Premiere, Illustrator, Photoshop.

Being part of a highly experienced, well-educated and multicultural team I was the UI Designer and Front-End Developer for the web app product. Designed, Proposed and implemented various UI Designs for the product taking in consideration big data analytics displayed in a slick and easy to use way. I also transitioned my self into the back-end side of development working on a complex and multilayered system, using external and internal APIs, making database queries and displaying data using visualisation libraries and techniques. I also produced various custom directives and modules for the front-end. I developed a multi linguistic static website using Jekyll and created a custom made admin system to use it. All under the umbrella of git, jira and release control systems/techniques.

In the mean while I was responsible for all the video productions that were used by our sales, marketing and account managing teams, helped the marketing team with requests for quick illustrations and similar requests.

Head Of Digital

Alchemy Asia (Hong Kong)

May 2016 - March 2017

- Approach all problems from a business solutions mindset.
- Project scoping and technical architecture.
- Working in conjunction with all other teams to deliver solid proposals and presentations.
- Advise and work closely with UX and design teams to ensure all optimal user journey.
- Working closely with client teams to develop systems alongside existing infrastructures.
- Developing new infrastructures for clients based on business requirements and analysis.
- Develop CDN and caching strategies relevant to the app, its users and business in question.
- Meticulously plan and execute projects to ensure timely and quality product delivery.
- Ensuring a hands on approach to project execution to guarantee all aspects of the project are on track and meeting expectations.
- Building new business through internal digital strategies.
- Developing relations with existing clients to secure new business opportunities.
- Business management including P&L for the department.
- Stay ahead of new technologies in order to benefit clients.

Data Visualization Front-End Developer

OpenCog Foundation

(Hong Kong PolyTechniq Univercity)
